color of velour, leather selectable

Trunk panel 217 359 333
visible carbon fibre primed without clear coat

Performance Kit

217 250 001

With this Power-Upgrade, connecting rods, big end bearings, crankshaft, bearing bushings, turbocharger, suction and compressor system, as well as many other parts replace the serial parts. Instead of 576 hp (430 kW) the heavily modified S Class now achieves an impressive 985 hp (735 kW) while the maximum torque climbs to an electronically limited 1,400 Nm at 1,500 - 3,500 rpm. So when fired up the MANSORY DIAMOND EDITION rockets to 100 km/h in 3.2 seconds and only stops at an electronically regulated 300 km/h.

Carbon engine cover included

Wheel arch extension L+R

217 595 251

visible carbon fibre primed without clear coat

Mufflers & Exhaust middle pipes

217 221 059

set - left & right
with throttle control

MANSORY Lowering Suspension

consisting of:

- 2 level adjusting rods front axle

- 2 level adjusting rods rear axle

Lowering of approx 20-30 mm

With the MANSORY Lowering Suspension you have the optimal symbiosis of excellent ride comfort during normal driving and agile direct response during fast cornering.

The product described in the instructions has been developed, and manufactured under consideration of the necessary safety regulations, and is subject to quality checks. To guarantee flawless, safe function and to eliminate any risk to people or property, this product must be installed properly. Therefore installation should only be carried out by trained specialists, with the specific technical and specialist knowledge required for installation in a vehicle, and the necessary tools. For this, you must carefully read and understand the fitting instructions.

MANSORY Lowering Suspension for Mercedes-Benz S-Coupe W217

217 900 101

2 level adjusting rods front axle, 2 level adjusting rods rear axle

Lowering of approx 20-30 mm

Front axle

Rear axle

Before starting work, check that all parts which should be included are present.

- Raise the vehicle on a suitable lifting mechanism at the position points specified by manufacturer, considering the relevant safety guidelines.
- Take off the original connecting rods from the height sensors on the front and rear axles.
- Put the connecting rod on the ball heads on the height level sensors and the holders.
- Re-fit the wheels to the vehicle according to Mercedes Benz workshop instructions.
- After installation of the connecting rod, no further adjustments should be made.
